

Emergency Water & Weatherproofing System for **All Existing Structures**

Belzona 3121 (MR7) offers outstanding protection to all existing structures. Its resistance to temperature changes makes it equally effective on bituminous, cementitious and metallic surfaces.

Designed for instant waterproofing under all weather conditions, at all times of the year, Belzona 3121 (MR7) is the most complete emergency repair system available. It withstands:

- STRONG WINDS
- DRIVING RAIN
- HEAVY SNOW
- ICE & FROST
- ATMOSPHERIC POLLUTANTS

The Belzona 3121 (MR7) membrane system follows all contours even at seams, upstands, flashings and vents. It is a totally bonded system, adhering to virtually all substrates without mechanical fastening, such as:

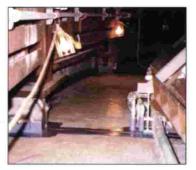

- CONCRETE
- STONE BRICK ASBESTOS
- COPPER ALUMINUM
- CAST IRON ASPHALT
- GLASS MILD STEEL
- TAR PLEXIGLASS
- WOOD LEAD
- GALVANIZED STEEL

The Unconventional Alternative.

BELZONA 3000 SERIES

Versatility in Use

- Can be applied during rain, snow, fog and frosty weather.
- Unaffected by subsequent rainfall.
- Will cure underwater.

Economy in Use

- Coverage rate up to 10 sq ft (1.0 m²) per liter for a two coat system.
- One product for all repairs.

Simplicity in Use

- No specialized equipment needed.
- No primers or conditioners necessary.

Effective in Use and Application

- Tough flexible waterproofing which moves with the substrate.
- Maintains flexibility down to -11° F (-24° C).
- Standard applications provide long term, maintenance free protection without further treatment.
- Emergency applications carried out under adverse weather conditions are easily upgraded with Belzona 3111 (Flexible Membrane) to provide long term maintenance free protection.

Accessories

• Belzona 9331 (MR7 Reinforcing Sheet) - A closed mesh fabric for use with Belzona 3121 (MR7). This sheet provides added durability.

AVAILABLE IN 1 LITER (33.8 OZ) AND 4 LITER (1.06 GALLON) UNIT SIZES
