

**BELZONA®**  
**4211/4221**  
MAGMA - STOP & MAGMA - SEAL

**The Complete Negative Pressure  
Waterproofing System**

The Belzona® 4211/4221 system combats water escaping from, or permeating through, masonry structures. Water seepage is a constant problem that can lead to serious hazards and structural damage.

Belzona's Negative Pressure Waterproofing System seals leaks and hydrostatic seepage without the need for external excavation. This system is comprised of two products, Belzona® 4211 (Magma-Stop) and Belzona® 4221 (Magma-Seal).

Belzona® 4211 (Magma-Stop) is a rapid setting material for stopping leaks even under pressure on brick or cementitious structures. When mixed with water, this dry powder formula solidifies in 2-3 minutes to stop hydrostatic water flow.

Belzona® 4221 (Magma-Seal) is a protective barrier coating for preventing water seepage through porous concrete, brick, masonry and stucco surfaces, forming a tough, flexible and water impermeable barrier.

Both products possess optimum adhesion, resilience, flexibility, toughness, durability and weatherability.

MAGMA-STOP & MAGMA-SEAL

BELZONA® 4000 SERIES MAGMA POLYMERS

### **Belzona® 4211 (Magma-Stop)**

#### **Simplicity in Use**

- Just add water, no additives needed.
- Simple manual application, no special tools required.
- Rapid set in two to three minutes.

#### **Versatility in Application**

- Use above or below ground.
- Suitable for exterior or interior use.

#### **Permanency in Service**

- Dimensionally stable; minimal expansion.
- Will not "wash out."
- Resists corrosive chemical attack better than Portland cement.

### **Belzona® 4221 (Magma-Seal)**

#### **Simplicity in Use**

- Supplied in ready to mix units.
- Easy brush application.
- Simple two coat system.

#### **Versatility in Application**

- Bonds to porous and non-porous surfaces including concrete and brick.

#### **Permanency in Service**

- Resistant to a range of organic and dilute inorganic chemicals.
- Tough durable waterproof coating.

BELZONA® 4211 (MAGMA-STOP) IS AVAILABLE IN 1 KG. (2.2 LBS.) UNIT SIZE.

BELZONA® 4221 (MAGMA-SEAL) IS AVAILABLE IN 15 KG. (33.1 LBS.) UNIT SIZE.
